DETAILED ACTION

Specification Objections

1. The meaning of every term used in any of the claims should be apparent from the descriptive portion of the specification with clear disclosure as to its import; and in mechanical cases, it should be identified in the descriptive portion of the specification by reference to the drawing, designating the part or parts therein to which the term applies MPEP 608.01(o) [R-3].

The specification is objected because claim 139 recites "computer-readable medium" and the specification fails to provide antecedent basis for this term.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 139 - 158 are rejected under 35 U.S.C. 101 because:

Regarding claim 139, this claim is directed to a computerized tool embodied on a computer-readable medium for facilitating forward looking strategic analysis of a collection of technical document. The specification fails to provide antecedent basis for the term "medium" and should have been objected to (MPEP 608.01(o)), such that the term "medium" itself would have reasonably been interpreted by one of ordinary skill as other than physical articles or objects to act as a hardware component and realize its functionality. As such, the claim is not limited to useful manufactures within the meaning of 35 USC 101, and therefore non-statutory.

Regarding claims 140 – 158, they are dependant of independent claim 139 and in view of MPEP 2106 (II) (A), are not statutory because they recite computing instructions, they are merely descriptive and lack the necessary physical articles or objects to constitute a machine or a manufacture within the meaning of 35 USC 101; therefore non-statutory.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
